

DD/A/ODP WEEKLY REPORT

Week of 16 - 22 September 1981

I. Major Activities During the Past Week:

A. Support to DCI: (U)

Registry (The Executive Registry System) The development of the DCI Executive Registry has been completed. User training will begin on 29 September 1981. [] (U)

STAT

B. Support to OF: (U)

Biweek Payroll System - The ODP testing of the master file update cycle has been executed for the program modifications for Pay Period 01, 1982. The initial results appear to be satisfactory. We have begun testing the Pay Compute Cycle and will review the results this week. [] (U)

STAT

GAS (The General Accounting System) We will meet with representatives from the Office of Finance and Production Division of ODP on Wednesday, September 23, to discuss the Fiscal Year End Closing schedule. The closing process will begin immediately following the successful completion of the September month-end processing. Applications personnel will be on call the weekend of 3 October to respond to program problems. [] (U)

STAT

C. Support to ODP: (U)

Graphics - The CHROMATICS interface to DISSPLA has been delivered and tested. A memo has been sent to ODE/SAG informing them that this request for service has been closed. [] (U)

STAT

D. Support to OL: (U)

ASAPS (Agency Standard Accountable Property System) Reporting requirements programming for ASAPS is now complete. Eight canned reports have been written with corresponding execs to run them. This completes the programming for the ASAPS database. [] (U)

STAT

E. Support to OP: (U)

Airline Ticketing Study - On September 14 a meeting was held between interested parties concerning the feasibility of establishing a connection between the Agency and the

[REDACTED]

preliminary meeting resulted in a generally favorable and encouraging exchange of information, with several questions getting answered and a few new questions being raised. A second meeting between [REDACTED] technical staff was scheduled for 30 September at the [REDACTED] regional offices. [REDACTED] (U)

II. Problems:

Terminal communications [REDACTED] were out from 1530 Monday 21 September until 1000 Tuesday 22 September. This outage, caused by Comten overtemperature due to lack of air conditioning, effected all Application terminals.

The general lost time is estimated as 300 man hours. Testing for payroll was effected. The testing for Pay Period 01 using Security File Numbers (SFN) has been rescheduled for 22 September. [REDACTED] (U)
